

**University of Leeds**  
Research Fellowship  
International Business  
Leeds, UK

This fellowship is a five year post in the first instance with three years of full-time research transitioning into a lectureship position with tenure subject to satisfactory performance.

This fellowship will be based in the Centre for International Business, University of Leeds (CIBUL), which was recently listed as the number one International Business Research Unit in the world (International Business Review Volume 15, No. 4, 2006). The fellow will work with an established interdisciplinary team on the strategy of multinational enterprises and resources with emission and environmental issues. The project will examine management trends and perceptions, particularly with regard to international activities. It will also evaluate the management of threats from governments and NGOs, particularly the environmental issues arising from current and future energies. The project will also contrast differing responses between energy multinationals of different national ownerships and in different sectors. One outcome of the project will be the projection will be a projection of successful strategies in the transition to future energies.

The successful fellow will be expected to have the interdisciplinary skills necessary to work across the Business School and with the other participating faculties. The fellow will have opportunities in the longer term to develop teaching skills in the Business School and in particular to contribute to the prestigious MSC in International Business.
